<p>RED INK, METAL, HENNA & PATCH TEST ADVICE</p> <p>(PLEASE READ)</p>	<p>RED INK IS THE ONLY COLOUR THAT NO CURRENT TATTOO INK MANUFACTURER HAS DEVELOPED TO BE HYPO-ALLERGENIC. MOST OF, OR THE REST OF INK MAKERS COLOURS ARE HYPO-ALLERGENIC, SO YOU ONLY NEED TO WORRY ABOUT RED IF YOU HAVE ALLERGIES TO CERTAIN PIGMENTS.</p> <p>UNFORTUNATELY, NOT MANY INK INGREDIENTS ARE RELEASED BY THE MANUFACTURERS, SO YOU MAY WANT TO DO A SMALL TEST ON YOUR SKIN BEFORE GETTING THE TATTOO. ASK IF THE TATTOO ARTIST WILL PUT A SMALL RED DOT OF RED INK ON YOUR SKIN AND KEEP IT THERE FOR A FULL 24 HOURS. IF NO SWELLING OR IRRITATION APPEARS, YOU'LL BE SAFE TO USE RED IN YOUR TATTOO.</p> <p>THERE ARE MANY METALS THAT ARE PUT INTO TATTOO INKS, INCLUDING NICKEL, WHICH IS SAID TO BE THE MOST COMMON METAL ALLERGY. MOST NORMAL EARRINGS ARE MADE FORM NICKEL, SO IF YOU CAN'T WEAR THOSE, SOME TATTOO INKS MAY NOT BE ABLE TO BE USED. IF YOU HAVE ALLERGIES TO METALS, THE ABOVE 24 HOUR DOT TEST SHOULD BE DONE WITH ANY COLOUR YOU MAY BE WANTING FOR YOUR TATTOO.</p> <p>HENNA TATTOOS (WHICH ARE NOT ACTUAL TATTOOS, BUT A DYE THAT STAINS THE SKIN FOR A FEW WEEKS), HAVE CHEMICAL PARA-PHENYLENE DIAMINE (PPD), WHICH CAN CAUSE THE "TATTOOED" AREAS TO BE SWOLLEN OR ITCHY FOR MONTHS. WORSE, IT CAN CAUSE YOUR BODY TO BECOME PPD HYPER-SENSITIVE AND BE UNABLE TO TOUCH THINGS DYED WITH PPD, WHICH IS A CHEMICAL IN MANY CLOTHING DYES. DOCTORS SUGGEST PEOPLE WITH SENSITIVE SKIN SHOULD AVOID HENNA TATTOOS. A LIST OF INGREDIENTS ON PACKAGES OF HENNA TATTOO DYE SHOULD LET CUSTOMERS KNOW IF THAT BRAND INCLUDES PPD OR NOT.</p> <p>IT GENERAL, IT SEEMS THAT OVER USE OF A DYE OR INK WITH PPD INCLUDED, THAT YOU THEN CAN BECOME HYPERSENSITIVE TO IT, WHICH IS WHAT CAUSES THE ALLERGIC REACTION. IT GETS TO THE POINT WHERE YOUR BODY CAN'T FIGHT IT ANY MORE. ESPECIALLY IF ITS FIGHTING AGAINST ANY METALLIC SALTS IN HAIR DYE AS WELL. THIS MAY CAUSE AN ALLERGIC REACTION. USING RED DYE ON THE SCALP CAN CAUSE HYPERSENSITIVITY AND THE BODY TO HAVE AN ALLERGIC REACTION TO ANY DYES ON THE BODY THAT CONTAIN THESE PPD'S, WHETHER THEY ARE OLD OR NEW.</p> <p>THIS IS WHY A PATCH TEST IS RECOMMENDED BEFORE HAVING A TATTOO.</p> <p>THE INK WILL BE DOTTED BEHIND THE EAR AND LEFT FOR 24 HOURS</p>
